SUMMARY

Senior React Developer with 5+ years designing, developing, and documenting software solutions for product user interfaces across logistics, retail, tourism, and education. Strong proficiency in JavaScript, TypeScript, React.js, HTML, and CSS, with production work in Material UI, Redux, Context API, REST APIs, HTTP, and Git. Proven teamwork and collaboration skills, attention to detail, creative problem-solving, and the ability to work independently under pressure to deliver projects on time. Experienced in reusable components, code reviews, troubleshooting, technical documentation, and SDLC delivery. Additional familiarity with React Native, iOS/Android concepts, Docker, cloud technologies, Swagger, Postman, Chrome DevTools, Jira, and ClickUp.

SKILLS

Frontend & User Interfaces: JavaScript, TypeScript, React.js, React Native, HTML, CSS, Material UI / Material, Next.js, Vue.js, Nuxt, Tailwind CSS, reusable components and libraries

State, APIs & Tooling: Redux, Context API, HTTP, REST APIs, WebSocket, Postman, Chrome DevTools, Swagger, Git, npm

Delivery & Collaboration: technical documentation, code reviews, troubleshooting, Docker, cloud technologies, Jira, ClickUp, teamwork, communication, attention to detail

Also used: Node.js, Blazor, Python, Go, PostgreSQL, MongoDB, Redis, JWT

WORK EXPERIENCE

Frontend Team Lead — Tipax

Aug 2025 - Aug 2026 · Representatives Management Panel · Tehran, Iran

- Designed, developed, and documented scalable React.js / TypeScript user interfaces with Material UI for the Tipax representatives management panel.
- Built reusable React components and libraries and defined Redux / Context API state patterns reused across multiple screens, cutting duplicated UI work for the frontend team.
- Led code reviews and improved workflows, toolchain, and technical documentation so teammates could onboard faster and ship with consistent architecture.
- Troubleshot and continuously optimized the React codebase using Git, Chrome DevTools, and REST API integrations, delivering on time under delivery pressure.

Tech: React.js · TypeScript · JavaScript · Material UI · Redux · Context API · Git · REST APIs

Senior Frontend Developer — Tosan Techno

Mar 2025 - Aug 2026 · Refah Barcode Scanner App · Tehran, Iran

- Developed React.js user interfaces for a barcode scanner application used in Refah retail stores, focusing on maintainable, readable frontend code.
- Implemented real-time HTTP / WebSocket flows between scanners, POS devices, and payment systems; verified integrations with Postman and Chrome DevTools.
- Tested, deployed, maintained, and troubleshot store-facing screens while self-managing assigned tasks and coordinating with hardware and backend specialists.

Tech: React.js · JavaScript · WebSocket · HTTP · REST APIs · Postman · Chrome DevTools

Frontend Developer — 3click (Deltaban)

Mar 2024 - Jun 2025 · B2C Platform · Tehran, Iran

- Built and maintained production user interfaces with Vue.js, Nuxt, HTML, and CSS for a B2C travel platform.
- Migrated Nuxt 2 to Nuxt 3 and improved performance and SEO of the shared component layer, reducing technical debt while shipping product updates on schedule with Git and REST APIs.

Tech: Vue.js · Nuxt 2/3 · HTML · CSS · REST APIs · Git · SEO · Performance

Full-Stack Developer — TopTours

Feb 2023 - Feb 2024 · Custom CMS Platform · Tehran, Iran

- Implemented React.js prototypes and a drag-and-drop frontend builder from wireframes and UI/UX designs, creating reusable components and libraries.
- Connected the React UI to a Blazor Server admin panel over REST APIs and documented setup plus complex builder behavior for the team.

Tech: React.js · JavaScript · Blazor Server · REST APIs · Technical Documentation

Frontend Developer — Kanoon Ghalamchi

Sep 2022 - Apr 2023 · Educational Platform · Tehran, Iran

- Developed React.js screens for the school website and management panel, improving user-interface flows and REST API integration with strong attention to detail.

Tech: React.js · REST APIs · HTML · CSS · User Interfaces

Frontend Developer — Mabna Intelligent Computing

Mar 2021 - Jul 2022 · Amirkabir University · Tehran, Iran

- Developed React applications for transportation and petrochemical use cases and shipped a multi-format file uploader with image, PDF, and Word preview that removed repeated manual document-handling steps.

Tech: React.js · JavaScript · File Upload · PDF Preview

SELECTED PROJECTS

Orbit Task Platform — GitHub

Team task-management backend with JWT, Redis, Swagger docs, and Docker Compose — practiced technical documentation, REST APIs, and container workflows.

Tech: Node.js · REST APIs · Swagger · Docker · Redis · JWT

Angular Smart Table Pro — GitHub

Reusable data-table library with virtual scroll, server-side datasource, drag-and-drop, and Excel export.

Tech: Angular · Reusable Libraries · Virtual Scroll · Excel Export

ConfigKit & Job Crawler Suite — GitHub

Type-safe Go configuration library (JSON/YAML/TOML/ENV) and a Python toolkit that crawls Iranian job listings and exports Excel results over HTTP.

Tech: Go · Python · HTTP · Validation · Excel Export

EDUCATION

B.Sc. in Software Engineering

Islamic Azad University, Science and Research Branch · Tehran, Iran

Bachelor's degree in Software Engineering with focus on software design, programming, and building production web applications.

LANGUAGES

Persian — Native · English — Professional working proficiency
