Valid Irish work permit — Stamp 1G

Open to relocation (EU / US) · on-site, hybrid or remote

PROFILE

M.Sc. Computing Science candidate at UCC (2026) with 7+ years shipping full-stack and LLM-powered products to real users. Promoted to team lead within 10 months. Merged contributor to Pinia and Vuetify.

WORK EXPERIENCE

Software Engineer — EaseTalk

May 2025 — Present · Cork, Ireland

Healthcare AI · University College Cork

- ▶ Building an AI-assisted clinical platform for physicians to manage patient records (audio and text), consultation notes, and communications.
- ▶ LLMs generate summaries, reports, and actionable insights across clinical cases.
- ▶ Designed the full database schema with GDPR and healthcare compliance built in.
- ▶ Built the backend for the Project Management System and integrated it into the PMS dashboard.

Tech: React · Next.js · .NET 10 · PostgreSQL · Azure · LLMs

Front-End Developer — Finca

Mar 2024 — Aug 2025 · Remote

Education SaaS · Contract

- ▶ Reduced bundle size by 40%, improving Lighthouse scores and enabling older devices (Android 7+, Chrome 63+) to load the app.
- ▶ Lazy-loaded major components to cut initial load time.
- ▶ Replaced heavy third-party libraries with lightweight custom utilities.
- ▶ Implemented a full UI redesign and resolved critical production bugs.

Tech: TypeScript · Vue 3 · Nuxt 3 · Pinia · Vite · Tailwind CSS · Docker

Co-Founder & Full-Stack Engineer — Blulexi.com

Oct 2022 — Jul 2025 · Remote

AI EdTech Startup

- ▶ IELTS practice platform using LLMs to assess speaking and writing skills — blulexi.com
- ▶ Built and deployed full backend and frontend from scratch on a Linux production server.
- ▶ Collected usability feedback from customers and iterated on features.
- ▶ Validated product-market fit with first paying customers.

Tech: OpenAI GPT · Next.js · React · Nuxt 3 · Python · Flask · MongoDB · NGINX · Linux

Frontend Team Lead — 3Click.com

Apr 2023 — Mar 2025 · Tehran, Iran

B2C Platform · Full-time

- ▶ Promoted to team lead after 10 months; mentored 3 frontend developers.
- ▶ Built an SEO Manager tool so the marketing team can update meta tags, redirects, and robots.txt without developer involvement.
- ▶ Led the migration from Nuxt 2 to Nuxt 3 across the customer-facing platform.
- ▶ Led technical decisions, aligned stakeholder expectations, and interviewed frontend candidates.
- ▶ Increased site speed by 20%, lifting SEO rankings and organic traffic.
- ▶ Refactored search pages to reduce technical debt.
- ▶ Fixed a broken payment flow and business logic errors, recovering lost sales.

Tech: Vue 2/3 · Nuxt 2/3 · Vuex · Vuetify · Webpack · REST API

Front-End Developer — Nazdik

Aug 2020 — Jul 2023 · Tehran, Iran

Investment Platform, PWA · Full-time

- ▶ Managed stakeholder expectations across Marketing, Tech, and Design teams.
- ▶ Delivered a responsive cross-platform web app with offline sync, dark mode, and a custom calendar on time.
- ▶ Built complex and modern UI to increase usability and user engagement.

Tech: Vue 2 · Nuxt 2 · Vuex · Highcharts.js · PWA · Sentry

Front-End Developer — Himart.ir

Sep 2019 — Feb 2021 · Tehran, Iran

Payment System · Full-time

- ▶ Built the payment system from scratch with a dual-screen setup: customer-facing display and seller management panel.
- ▶ Improved page performance and responsiveness by reducing UI action latency and removing unnecessary animations.

Tech: Electron.js · Vue 2 · Node.js · WebSockets

SKILLS & TECH STACK

Frontend	React · Next.js · Vue 3 / Nuxt 3 · Angular · TypeScript · JavaScript · React Native · Tailwind CSS · Vuetify · Pinia / Vuex · Electron.js
Backend	Node.js · .NET / C# · Python · Django · Flask · Go · REST API · WebSockets
Database	PostgreSQL · MongoDB · MySQL · SQL · Data Encryption / GDPR
AI & ML	LLM Integration · OpenAI API · PyTorch · TensorFlow / Keras · Scikit-learn · Pandas
Tools & DevOps	Git · Docker · Azure · NGINX · Linux / Bash · Vite / Webpack · Figma · Jira · Sentry

EDUCATION

M.Sc. Computing Science

University College Cork, Ireland

Sep 2025 — Sep 2026 · NFQ Level 9

Coursework: Artificial Intelligence, Machine Learning, Complex Systems Development, Scalable Computing for Data Analytics, Mobile Applications Design.

B.Eng. Computer Engineering

Shahid Beheshti University, Iran

2016 — 2020 · CGPA 3.16 / 4.0

Research intern at IPM: solving partial differential equations with deep learning.

OPEN SOURCE

vuejs/pinia #2427 · #1356

Merged contributions to the official Vue state-management library.

vuetifyjs/vuetify #18865

Merged contribution to the Vuetify component framework.

SELECTED PROJECTS

HybridVAE — Semi-Supervised Network Intrusion Detection

Lightweight semi-supervised generative model (< 1 MB) for real-time cyberattack detection on resource-constrained IoT edge devices and routers. Achieved a 100% detection rate on zero-day attacks during testing, significantly outperforming traditional baseline models.

Tech: Python · PyTorch · Pandas · Scikit-learn

Stock Price Forecasting

Built automated web scrapers to gather financial market data; implemented and trained LSTM and CNN architectures for price prediction. Benchmarked deep-learning model performance against a traditional statistical ARIMA baseline.

Tech: Python · Keras · TensorFlow · ARIMA · Pandas · Beautiful Soup

University Feedback System

Engineered a full-stack, automated feedback pipeline allowing students to securely submit evaluations to university departments.

Tech: Java EE · MySQL · Vue 2 · Vue Router · Tomcat · jQuery

Custom Compiler Implementation

Built a compiler from scratch based on custom context-free grammars (CFG) that parses source code and emits functional Assembly code.

Tech: Java · Context-Free Grammar · Assembly

Android Platformer Game

Developed a 2D side-scrolling, Mario-style runner game optimized for mobile performance, touch controls, and physics handling.

Tech: Java · LibGDX
